

FICHE TECHNIQUE

Ref. 1888-AEGY

Elastic tape in "Y" STEEL FLEX with absorber and carabiners.

Features:

Elastic tape in "Y" of 1.50 meters with ERGO energy absorber

- "Y" mooring element with absorber, which always allows to be fastened to the anchor point when going from one anchor point to another.
- The elastic band prevents tripping, saves space... due to the shorter length of the tape at rest, increasing user comfort.
- ERGO SHOCK energy absorber, energy dissipater in case of falls in height. Automatic steel carabiners quick opening and 2 lightweight aluminum hooks. Total length of 1.50 meters (including carabiners). Extended length: 1.80 meters Automatic steel carabiner with a quick opening of 20mm opening (to attach to the harness). 2 lightweight aluminum carabiners with a quick opening opening of 60mm (to attach to the anchor point).

Uses and functions:

as a fall arrest element, preventing reaching the points where a free fall may occur or as an anti-fall element in the event that it occurs finally, in activities that require frequent passing from one anchor point to another (Distance minimum to the ground of 6 meters).
