

FICHE TECHNIQUE

Ref. 1988-OE

Mod. "THUNDER". Mid- high attenuation earmuff.

Features:

Very light earmuff with medium-high attenuation (27dB). Adjustable in height. Dielectric hearing protector, without mechanical components (Metal-free). Increase user visibility. Angular terminations that generate a better behavior in the dispersion of sound. Folding harness to make it compatible with helmets, face shields...

Uses and functions:

in all types of activities with moderate noise (light industry, construction, workshops, outdoor work, food...).

 EN352-1 Hearing protection. Earmuffs. SNR= 27 dB (H= 30, M= 23, L= 14)
